EXPERIENCE

AI Chatbot Intern	2025
<i>NPCIL – Government of India Enterprise under BARC</i>	
- Engineered a fully offline AI-powered PDF chatbot using BERT-based semantic search, enabling secure document querying in air-gapped government environments without any internet dependency - Leveraged pdfplumber and PyPDF2 for robust multi-format PDF parsing and text extraction, achieving accurate retrieval across complex document layouts - Designed and deployed an interactive web interface using HTML, CSS, and JavaScript with real-time query response, reducing manual document search time significantly	

PROJECTS

Cognify AI – Personalized AI Study Companion <i>React.js, FastAPI, MongoDB, JWT, Recharts</i>	
- Built a full-stack student productivity platform featuring a study session tracker, multi-subject quiz system with timer, and a dynamic dashboard with line, bar, and pie charts visualizing performance trends - Developed a rule-based AI recommendation engine that analyzes subject-wise quiz scores to identify weak areas (below 60%), suggest personalized study topics, and deliver motivational insights; secured with JWT authentication and bcrypt password hashing	
Sereno – AI-Based Digital Well-Being Platform <i>Python, FastAPI, BERT, React.js, MongoDB</i>	
- Architected a full-stack mental well-being platform with BERT-powered sentiment analysis to classify user text, surface emotional insights, and deliver context-aware personalized recommendations - Built scalable RESTful APIs with FastAPI and MongoDB; developed a real-time community chat module and a dynamic React.js dashboard for tracking user well-being trends over time	
Learn Able <i>Swift, SwiftUI, AVFoundation, Speech Framework</i>	
- Developed an iOS accessibility app with real-time speech-to-text, voice-guided navigation, and braille conversion, enabling inclusive learning for visually and hearing-impaired users - Integrated AVFoundation and Speech Framework for real-time audio processing, ensuring seamless and responsive voice interaction across all supported devices	
Loan Approval Prediction <i>Django, Streamlit, Python, Scikit-learn</i>	
- Built an end-to-end ML pipeline with feature engineering, SMOTE-based class balancing, and a Scikit-learn classifier for accurate loan eligibility prediction - Deployed the model via an interactive Streamlit interface allowing real-time input and instant prediction results with visual feedback	

TECHNICAL SKILLS

Languages: Python, HTML/CSS, Swift
Frameworks & Technologies: Django, Streamlit, FastAPI, React.js, SwiftUI
Data Science & ML: Pandas, NumPy, Matplotlib, Scikit-learn, Seaborn, PyTorch, BERT
Developer Tools: Tableau/Power BI, Excel

EDUCATION

SRM Institute of Science and Technology	Chennai, Tamil Nadu
<i>B.Tech Computer Science Engineering (Data Science)</i>	<i>2023 – Present</i>

CERTIFICATIONS

Oracle Cloud Infrastructure 2025 Certified Data Science Professional	2025
Networking Basics – Cisco Networking Academy	2025
Deloitte: Data Analytics and Job Simulation	2026
Programming in Java – NPTEL	2024

ACHIEVEMENTS

Volunteer Recognition – Data Science Conclave '25	March 2025
<i>SRMIST</i>	
HackNova – 24-hour Hackathon Participation	March 2024
<i>NSCC SRM</i>	
Code Craft Chase – Recognition by TEAM CENTINELS	March 2025
<i>SRM IST</i>	
Mobile Security Workshop – Mobile Device Security Training	September 2023
